1. Introduction

STEM Bot is a Telegram bot developed to help users check their STEM membership eligibility quickly and securely. This guide explains how to use the bot step by step.

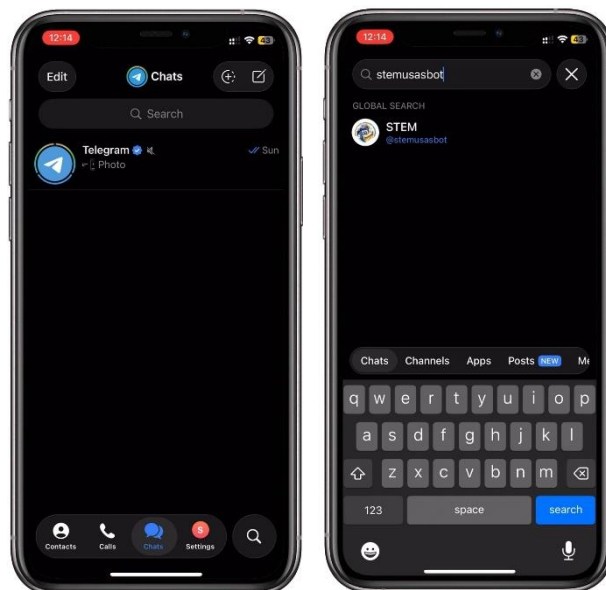

2. Requirements

Before using the bot, make sure you have:

- A Telegram account
- An active internet connection
- Access to the STEM Bot

3. How to Use the STEM Bot

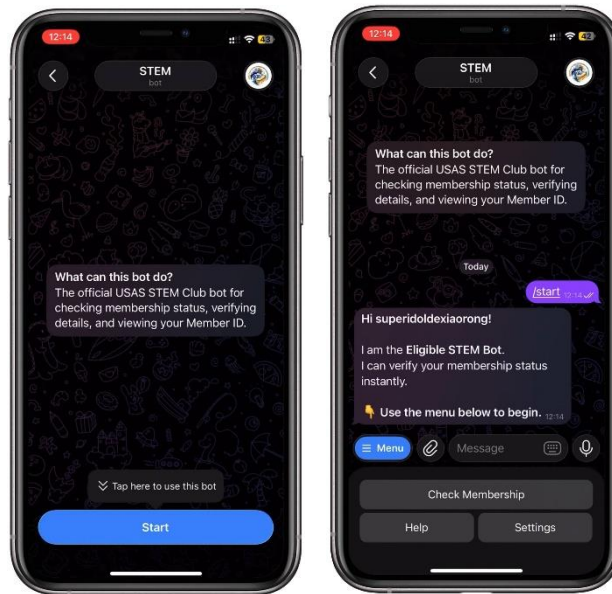

Step 1: Open Telegram & Search for the Bot

- Open the Telegram on your device.
- Tap on the search bar and type **stemusasbot**.
- If the bot appears under *Global Search* as **STEM (@stemusasbot)**, select it to open the chat.

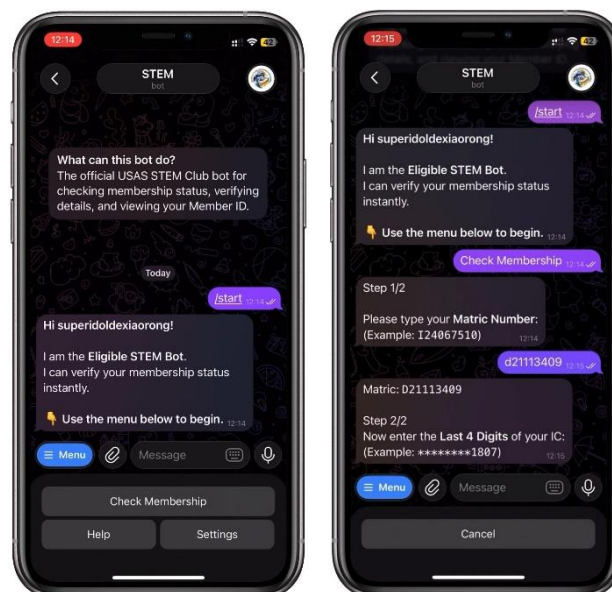

Step 2: Start the Bot

- After opening the STEM bot chat, tap the blue **Start** button at the bottom of the screen.
- The bot will respond with a greeting message. Three menu buttons will then appear below the chat: **Check Membership**, **Help** and **Settings**

Step 3: Check Eligibility

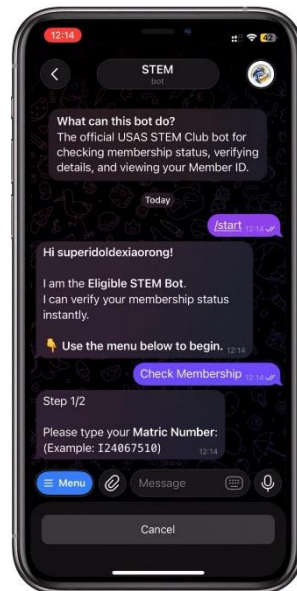

I. Select the 'Check Membership' & Enter your matric number.

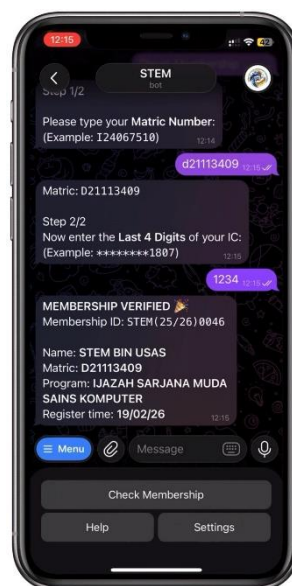

- Select the **Select Membership** button to check your membership status.
- The bot will then prompt you to enter a valid matric number for verification.

II. Enter the last four digits of your IC number.

- The bot will then request these four digits to complete the verification process before displaying your membership status.

III. The bot will display your eligibility status.

- The bot will then request these four digits to complete the verification process before displaying your membership status.

Step 4: Change the Language

- To use the bot in a different language, tap the **Settings** button in the menu.
- Select the **Language**, then choose your preferred language **English** or **Bahasa Melayu**.
- The bot will confirm your selection and update all messages to the chosen language.

4. Contact / Support

For any issues or assistance with the STEM Membership Bot, you can reach out through the following channels:

Email: persatuanstem@usas.edu.my – for membership or technical queries

Telegram: @stemusasbot – for quick bot-related questions
